

# Tell All Your Friends

Feeder

Staring out to reach a star  
Contemplating life on mars  
Life's a cover magazine  
I'm an eggshell under feet

Till I see this house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun

New intentions all around  
Put the brakes on, slow it down  
Trying to find a new release  
Find a space that you can breath

But I've seen a house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun

But don't come around, pulling me down  
Telling the world how I let you down  
Just tell all your friends  
I wanna dream with you

So tell all your friends and neighbors too  
CNN BBC world news  
Tell all your friends I wanna dream with you

Tell all your friends  
Tell all your friends  
Tell all your friends

I don't wanna sit here catching flies  
Cause I have seen this house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun

But don't come around, pulling me down  
Telling the world how I let you down  
Just tell all your friends  
I wanna dream with you  
So tell all your friends and neighbors too  
CNN BBC world news  
Tell all your friends  
I wanna dream with you
