## **Tell All Your Friends**

Staring out to reach a star Contemplating life on mars Life's a cover magazine I'm an eggshell under feet

Till I see this house under pale blue skies With golden fields that will burn your eyes So let's take a drive underneath the sun

New intentions all around Put the brakes on, slow it down Trying to find a new release Find a space that you can breath

But I've seen a house under pale blue skies With golden fields that will burn your eyes So let's take a drive underneath the sun

But don't come around, pulling me down Telling the world how I let you down Just tell all your friends I wanna dream with you

So tell all your friends and neighbors too CNN BBC world news Tell all your friends I wanna dream with you

Tell all your friends Tell all your friends Tell all your friends

I don't wanna sit here catching flies Cause I have seen this house under pale blue skies With golden fields that will burn your eyes So let's take a drive underneath the sun

But don't come around, pulling me down Telling the world how I let you down Just tell all your friends I wanna dream with you So tell all your friends and neighbors too CNN BBC world news Tell all your friends I wanna dream with you

Tell all your friends
