

Universe of Life

Feeder

We can't disguise
When our faces show the fear that is inside
There's no surprises, no excuses
Just the body flows

All the lies
And a mono sound that is waking up the dead
Pulling thoughts from side to side
Like a puppet show

Upper hand
See the fires burn when the sun gets low
Sending shockwaves through our bodies
To the ground below

R.: Seeing is believing now there's nothing at all
Don't be fooled by foolish minds
Maybe there's a reason at the life that we hold
In this universe of life

Your hands
Well up high to a sky that is glowing red
Shepherd's smiling in our memories
Than thoughts instead

Safe inside
In our beds as our routine slides away
On the ice there's a hole that we're heading for
And the fish had dragon heads

Seeing is believing now there's nothing at all
Don't be fooled by foolish minds
Maybe there's a reason at the life that we hold
In this universe of life

We will go (we will go) to the end
The stars above the sky is now below
We will find (we will find) inner strength
Wave goodbye to soul we used to know

Upper hand
See the fires burn when the sun gets low
Sending shockwaves through our bodies
To the ground below

In this universe of life

Maybe there's a reason at the life that we hold
Don't be fooled by foolish minds
Seeing is believing now there's nothing at all
In this universe of life

(Life, life...)
