

# We Went For A Ride

Fefe Dobson

We went for a ride  
Undercover of the twilight  
And the traffic on the road  
And there's only you and I  
I hope we never get back home  
'Cause I'm feeling serenaded  
By the coming of the night  
And I wish we'd go forever  
And I wish we could just

Drive away  
We could drive away  
We could drive away  
Into the night

We went for a ride  
With your words of consolation  
And the trees of crystal white  
I'll be praying for a red light  
To extend this precious night

'Cause we both know where I'm going  
And we know it just ain't right  
But there's nothing we can do  
Except to keep on moving

Drive away  
We could drive away  
We could drive away  
Into the night

We went for a ride  
We went for a ride  
We went for a ride

We went for a ride

Here we are  
We are alone together

We went for a ride

Here we are  
We are alone together

Here we are  
We are alone together  
We went for a ride

Here we are  
We are alone together  
Here we are

Here we are  
We are alone together  
Drive away  
Drive away

To any place faraway

Here we are

We are alone together
