

## Crystal Ball

Felt

I could be doing something new  
Young fresh and exciting  
Name an eccentric thing you won't do  
And so you wanted to be free  
Don't we all  
What's past America  
Are we so scared we can't see

And then you said that I had it all  
Saw through your crystal ball  
And saw me in depth  
Like I'd never seen myself before  
You seemed to think that  
There still was more  
But it's that crystal ball  
It knows me too well  
And I don't know myself at all

Suppose someone said to you

your life's through  
Or you've just got one more chance left to live  
Which would you choose  
You'd run to your mother to help you decide  
We might as well all just stay in our rooms until we  
Die

And then you said that I had it all  
Saw through your crystal ball  
And saw me in depth  
Like I'd never seen myself before  
You seemed to think that  
There still was more  
But it's that crystal ball  
It knows me too well  
And I don't know myself at all
