

## September Lady

Felt

September lady's just woke up  
You better take that smile and run  
September lady's not for you  
You can try someone new  
Garrulous woman  
Her mind is all made up  
Her face is a mess  
September lady's just woke up  
And when she tells you, she tells you what to do  
You go straight into her  
And you know just what it is, know just what it is  
Maybe I could reach for a star  
A star is what I was hoping for  
Maybe I could reach for the moon  
Maybe we'll be there soon  
I go into the pillow  
Your head is underneath  
There's blood on your legs  
Your burning in the heat  
You open wide, the sheets I slip inside  
And you look so beautiful  
And I know just what it is, know just what it is  
September lady's just woke up  
You better take that smile and run  
September lady's not for you  
You can try someone new
