

# Whaleface

Felt

Your shit don't stink  
Your ship won't sink  
Disapproving gays, but the bitch won't blink  
Holier than, greater than thou  
Hold it in, I can tell that you're proud  
We're not allowed  
To feel equal  
You don't get down  
With real people  
We're all so small  
In your big world  
Go ahead and frown up  
And let that lip curl

You got your generating, elevator eyes  
Look me up and down like I'm the species you despise  
Your arrogance, apparent, you can't wear it inside  
Like a character that you don't care enough to hide  
You act like you embarrassed by the rest of us guys  
When you need oxygen like the rest of the pride  
Like the rest of the school  
I guess you too cool  
Your shit's too hot to drop in our pool  
But don't get beached bitch  
You got a tummy full of plankton  
Ain't nothing but some sea shit  
Full of yourself so you float to the top  
A human hot air balloon that I'm hopin' to pop  
My sharp wit verse your really dull animal  
Your cynicism really isn't hard for you to channel so  
It's effortless  
You're better than the rest of us  
I get it  
I admit  
Why you even waste your breath on us?

Scratching "Oh shit"

Hey wait  
You lookin' at me with the whaleface?  
Judge and jury tryin' to stay out of a stalemate  
Spoken like you know the truth  
Stop pretendin'  
Check up on yourself  
Tell me who you condescending?  
That's not special  
That's not a rare case  
A bunch of assholes  
Evolving at a snail's pace  
They hold their nose up in the air  
Until they open up and share like they know that you care  
Yeah, say thanks for the rain on the parade  
Make a little hate like it raises up the stakes  
I'm not the first to mouth the words that I'm not perfect  
But you wouldn't need to curse it if you went and found a purpose  
Scratch the itch til your fingernails break  
You know it

You felt it  
So what your inner realm say?  
You smell fake like jail bait and hair spray  
Tell me how to fail taste and oh have a great day
