

# Speak In Tongues

Ferras

Everything's different  
Something's gone missing  
I'd travel the distance  
To drown out the sound  
Of the noise we make

We talk the same shit  
Expecting to shape shift  
But we just jump ship  
And swim in the wreckage  
Of what we say

How do we get to the naked truth  
Cause I got nothing if I don't got you  
What have I got  
What have I got  
What if we've got nothing else to lose  
The only thing left for us to do  
Is turn the lights out

No more words  
I want to speak in tongues  
No more words  
Talk to me with your touch  
Body vibration is our heart to heart  
No conversation's  
A good place to start  
No more words  
I want to speak in tongues

You never listen  
And I play the victim  
Why don't we shut up,  
Come undone,  
And change  
Who we both become

I fire weapons  
You put up resistance  
Either one of us bends  
And we end this,  
Or end up just enemies

How do we get to the naked truth  
Cause I got nothing if I don't got you  
What have I got  
What have I got  
What if we've got nothing else to lose  
The only thing left for us to do  
Is turn the lights out

No more words  
I want to speak in tongues  
No more words  
Talk to me with your touch  
Body vibration is our heart to heart  
No conversation's

A good place to start  
No more words  
I want to speak in tongues

In a bed of silence  
I'm gonna read you  
In the voice of stillness  
I'm gonna steal you  
Feel you  
Heal you

And turn the lights out

I want to speak in tongues  
No more words  
Talk to me with your touch  
Body vibration is our heart to heart  
No conversation's  
A good place to start  
No more words  
I want to speak in tongues
