

Great Big Problem

FFH

You were once with me but you decided to turn
Now my jealousy is a fire that burns
To the core of me when will I ever learn

I could walk away but that wouldn't be like me
I could turn my face but then I couldn't see
You coming back to me I'm waiting for that day

I've got a great big problem
You can't ever get to the bottom of
My love, no matter what you do
I can't let you go

I've got a great big problem
You can't ever get to the bottom of
My love, no matter what you do

You refuse to be the one I meant for you to be
If you could only see how this is killing me
You'd come back to me I would set you free

I call your name but it's always the same
You walk away it's always the same
