

The time has come to scorch the earth
And to start again clean
Bend the people to our will
With propaganda machines

Reconstruct the heirarchy
Revolution start right here
Nihilistic anarchy
Obedience acheived through fear

This is our democracy
It's one for you and two for me
Trust in us, we know what's best
Violence and civil unrest

Infiltrate the battle zone
Lost soldiers coming home
Be a king or be a slave
Honor lies in an unmarked grave

Every man must choose his path
Will you fight or will you run?
It's us or them, just do the math
Stand up and be someone!

Just something you should understand
Before you come to invade my home
Justice stings like the back of my hand
So you better not come alone
