

A Bottle A Day

Fiddler's Green

At the end of the night, by the light of the day
Let's raise our glass to the sky!
A bottle a day keeps the doctor away
Let's raise our glass, drink your problems away

Come on my friend, leave everything outside
Take a seat at the cracker-barrel
Your day's been quite hard, your live torn apart
But now it's time to let it all hang out

At the end of the night, by the light of the day
Let's raise our glass to the sky!
A bottle a day keeps the doctor away
Let's raise our glass, drink your problems away

Let's make a stand, let's go all the way
Let's paint the town red, change the world for one night
We're just a small part in a game with bad cards
It's all in your hands so let's go out and play

Come on my friend, take a walk on the wild side
The dead are all sleeping, but we're still alive
To burn it all down, to leave with the crown
The city lies sleeping as we walk away

At the end of the night, by the light of the day
Let's raise our glass to the sky!
A bottle a day keeps the doctor away
Let's raise our glass, drink your problems away

We don't care, 'cause we're losing day by day
We don't care, 'cause we're the lost ones anyway
I know that these times are hard
Hard times can tear your life apart
Just keep moving, don't rund away!

At the end of the night, by the light of the day
Let's raise our glass to the sky!
A bottle a day keeps the doctor away
Let's raise our glass, drink your problems away

At the end of the night, by the light of the day
Let's raise our glass to the sky!
A bottle a day keeps the doctor away
Let's raise our glass, drink your problems away
