

Greens And Fellows

Fiddler's Green

This one goes out to the Greens and fellows
And this one goes out to our friends
While so many leaves fade from green to yellow
You're never alone till the end

This one goes out to the Greens and fellows
Their hearts are beating as one
With so many trees giving peace and shadow
You're never alone till it's done

You might be my Greens and fellows
But I am far far from home
You should know I'm weak and mellow
My life is meant to roam

This one goes out to the Greens and fellows
Their voices rising as one
While so many words have been spoken and swallowed
A song is no song till it's sung

You might be my Greens and fellows
But I am far far from home
You should know I'm weak and mellow
My life is meant to roam

You might be my Greens and fellows
But I am far far from home
You should know I'm weak and mellow
My life is meant to roam

You might be my Greens and fellows
But I am far far from home
You should know I'm weak and mellow
My life is meant to roam
