

## Out of the Darkness

Fiddler's Green

How does it feel when your little world's broken  
Everything's splattered with dirt  
Too many words full of poison I've spoken  
Now you are finally hurt  
Nobody came from the outside to touch us  
The enemy came from within  
He came with his fear and with fear he did seize me  
Tell me now where to begin

Welcome again to my hour of darkness  
I put a spoke in my wheel  
I was the fool who just gave it away  
But this was the way I did feel

I couldn't help but I  
I'll set it straight  
No need to hide behind doubts  
And I'm begging you please  
Won't you hear me I'm calling, so

Take me out of this darkness  
And right back into the light  
Show me how can I get back to you

Welcome again to this hour of darkness  
The shadows are finally back  
All of my nightmares are waltzing Mathilda  
Better I turn on the light
