

Summer Song

Fiddler's Green

I hang around and watch the sky
And high above some birds are passing by
I wonder where they'll be tonight
The heat is on, it burns my skin
And it feels so good, I know that I will win
Everything is going to be alright

But there's a breeze
That's blowin' from a foreign land, far away
With a song
That will never ever cease for me

Feels like coming home
To you - again

The air is flickering from the heat
But I can't stand still I've got that city beat
And it makes me run around in town
I float two feet above the ground
And this crazy world keeps spinnin' round and round
I'm speedin' up I'm switchin' to warp 5

Don't go, I'm beggin' you, tonight
Don't go, you make me feel alright
