

Well here I am again just laying here
Reliving the autumn night that was destined,
Truly destined to be us

A million things are going through my mind
If I take a chance, I promise I will never ever fall behind
I gotta get out of here (I've truly done my time)
I gotta get out of here
Cause this could be my night

So take a chance in San Diego
Cause this could be the last time
To do it big and live the California dream
This could be the last time

The last time to get what you deserve

Pick yourself up
There's hope for today
You have your friends

It'll be okay to take the chance and do it for yourself
Okay to take the chance and live with what was dealt

I gotta get out of here
I gotta get out of here
RIGHT NOW!

So take a chance in San Diego
Cause this could be the last time
To do it big and live the California dream
This could be the last time

Show 'em what you got

So take a chance in San Diego
Cause this could be the last time
To do it big and live the California dream
This could be the last time

I gotta get out of here
