Sleep Well Tonight

Sleep well, tonight I'll wake you at the first sign of light If you just make sure You sleep tonight

Take care, stay with us All you've seen has gone If you dream the truth It will all come clear

Pull me up just to make a stand

If you could take a lifetime away And make me come back down If you could take the hours then Maybe we could fall apart I could stay the same

Sleep well, tonight I'll wake you at the first sign of light If you just make sure You sleep tonight

We fell like everyone else has our mark Will show where we were for our last time We'll carve the marks to remember this

If we could take a lifetime away And make us come back down If you could take the hours then Maybe we could fall apart I could stay here

Sleep well, tonight Sleep well, tonight Sleep well, tonight

If we could take away the summit We could climb the highest we've ever been to If we could take away the summit If we could take away the summit If we could take away the summit Fightstar
