

# Unfamiliar Ceilings

Fightstar

Some of us will learn  
But none of us should know  
Smoke'll fill this room  
There'll be nothing left to show

Hold onto the ones you love  
There won't be time to show  
Enough

We need each other like  
Flowerpots and dirt  
Seven years we've spent  
Growing from the Earth

It's hard to see  
How all of this will end  
For consequence  
On a broken heart to mend

Stay awake with me  
It's getting light outside  
When time is still for you it hurries  
Stay awake with me  
So I can see the sun  
Rising up upon your shoulder

People change their ways  
When there's nothing left to lose  
Coffee, talk and crimes  
Runs cold blood your time(?)  
You won't recall  
All your wins(?)  
But the toughest beats(?)  
Will hold your heart  
And mind  
(Mind)

Stay awake with me  
It's getting light outside  
When time is still for you it hurries  
Stay awake with me  
So I can see the sun  
Rising up upon your shoulder

Stay awake with me  
Take this picture  
And move your face a little closer  
Stay awake with me  
And close this window  
And stop this room from getting colder

Some of us will learn  
But none of us should know  
Smoke'll fill this room  
There'll be nothing left to show

Stay awake with me

It's getting light outside  
When time is still for you it hurries  
Stay awake with me  
So I can see the sun  
Rising up upon your shoulder

Stay awake with me  
Take this picture  
And move your face a little closer  
Stay awake with me  
And close this window  
And stop this room from getting colder
