We Are Alive

Standing here under heaven's light I do believe I take hold of this precious time Given to me Catch the moment and take it in This is the dream You and I we were born for this Here now we're free

We're feeling good tonight Can't keep it all inside We are alive We're shining like the stars Just being who we are We are alive

Share the love, give all that you can Your heart is full Let it rain like a waterfall Unstoppable

We're feeling good tonight Can't keep it all inside We are alive We're shining like the stars Just being who we are We are alive

Nothing can stop us now Nothing can slow us down We're feeling so alive

We're feeling good tonight Can't keep it all inside We are alive We're shining like the stars Just being who we are We are alive

Fireflight
