Ride these horses down  
To sculpture the World  
The way we want it to  
So much better just for you  
Honey Locust everywhere  
Honey Locust...everywhere

To climb, to climb the highest mountain  
I'm going down  
We're going under  
Won't live to see how this world will come to be  
Save nothing for the people to be

Use all the strength you need  
We are losing faith  
In the birds and the tales  
From the people who had something to say

Ride these horses down  
To sculpture the World  
The way we want it to  
So much better just for you  
Honey Locust everywhere  
Honey Locust...everywhere

Ride these horses down  
To sculpture the World  
The way we want it to  
So much better just for you  
There's a desert in me...  
Honey Locust everywhere

We'll sweep away the birds from the sky  
This isn't the time to turn the blind eye  
We're going down  
We're going under  
These are the depths we all shall plunder

Ride these horses down  
To sculpture the World  
The way we want it to  
So much better just for you  
Honey Locust everywhere  
Honey Locust...everywhere
