

Keep it up

Firefox AK

You went out on a cold night
Saw something one dare
Not to think about
To think about

Since then you were never the same
Had a hard time seeing me
And everyone else

What will you need
To keep it up
How long will you need
To figure it out?

You dragged yourself down starting with
Leaving your job your friends and family

All you said was that everything
Spins around and around
And it it drives you mad

What will you need
To keep it up
How long will you need
To figure it out?
