

## Once I Was Like You

Firefox AK

I envy your gaze  
And the light air surrounding you  
Once I was like you

But people say that I'm different now  
They say that I might be from the moon

Strange that it seems  
Little did I know that it was true  
Strange that it seems  
Little did I know that you knew too

Guide me to cloud nine  
I can feel it fading  
My dreams are gone  
I contemplate and interrogate  
Until there's nothing left
