

# Let Go

Firehouse

When it's cold outside  
And you're all alone  
Nothing feels right  
For you

When the stress weighs you down  
You can't take anymore  
The world is trying to tell you  
What to do

Just one chance at a lifetime  
You gotta stop and look around on your way  
If you wanna float like the leave on the wind  
Then it's never too late to change

Just let go  
Take a deep breath and go with the flow  
Make it easy on yourself  
Let go  
Things'll get better I know  
You just gotta let go

Standing in the dark  
Your backs against the wall  
And you feel like giving up  
Don't give in

When your life is like a question  
You wanna know what you should do  
You'll find all of the answers  
Inside you

Just let go  
Take a deep breath and go with the flow  
Make it easy on yourself  
Let go  
Things'll get better I know  
You just gotta let go

Just let go  
Take a deep breath and go with the flow  
Make it easy on yourself  
Let go  
Things'll get better I know  
You just gotta let go

Let it go  
Go with the flow  
Things'll get better I know  
You just gotta let go
