

Love Don't Care

Firehouse

Little girl, face all black and blue
But she knows better
That's not the way a man should treat you
But that's ok, she'll change her life tonight
She's leaving him
For a woman who will treat her right

And everybody needs somebody
She could be with anybody
Doesn't matter if it's not another man

Because love don't care who you love
I said love don't care who you love
If you ain't hurting anybody
And if you feel it deep inside
Then love don't care who you love
Don't care who you love

Little girl, she's no sister, she is white
But she loves a brother
Takin' him home to meet her folks tonight
Mom and dad don't understand
We're all the same inside
They just don't realize
That love is always colorblind

And everybody needs somebody
You can be with anybody
It's not the color that makes the man

Because love don't care who you love
I said love don't care who you love
Don't let anybody tell you
That it's wrong if it feels right
'Cuz love don't care who you love
Love don't care

And everybody needs somebody
You can be with anybody
So love someone who makes you happy
