

You know the whole world is changing  
and it's moving so fast  
That today's innovations never seem to last  
You're just a digital slave with an email address  
Too much information only means more stress

Welcome to the computer age  
You've got to have every machine that we make  
Stronger faster new and improved if you want to compete  
(check it out)  
'Till the next vest thing makes you obsolete

Stay up to speed with technology  
or you will be left in the dark  
You better be afraid if you can't keep up  
it'll be too late  
And you will be left in the dark

They can always page you or call you  
on your cellular phone  
There's no way you can hide the  
won't leave you alone  
CD-Rom to DVD, vinyl lp to mp3
