Backwards Over Germany

I keep saying, I don't understand Well, she knows me, I don't go that way It might be better in another town When you're never there and he's never around

If you'd ask me, well, it's just not right And I'll know that until the day that I'll die And I'll listen to every word you say It might be your truth but to me it don't make no sense at all It don't make no sense at all

And I don't like this, mess I'm in My life's been made out of trouble Since I don't know when Well, it's been some time now

And I've been on my own I've had time to think now And it don't make no sense at all It don't make no sense at all

Ohh, that's just my luck Well, that's just my luck

Any day now It will all break down

I keep saying and I don't understand What she knows I don't go that way I keep saying and I don't understand What she knows I don't go that way

I keep saying and I don't understand What she knows I don't go that way I keep saying and I don't understand What she knows I don't go that way

Any day now It will all break down Yeah, any day now It'll break me

Well, c'mon now And think about it Take a long hard look at it You see it don't make no sense at all

Take a long hard look at it You seem to make no sense at all
