## **In Place**

Fireside

I've got to control my ups and downs I've got to control your perfect lies You say that my downs are on the outside Forced to my skin like clothes Try to take your love And throw it back in place Try to take your love And throw it back in place But you are so strong when it all comes down You dress up shut and throw up

But I keep myself in my state Yeah I keep myself in my state Try to take your love And throw it back in place Try to take your love And throw it back in place She said I'm sorry that you lost your job But I've been trying this for far too long now I've been trying this for far too long now
