

# I Confide

Firewind

It seems it's over  
When the crowd is gone  
The night is silent  
Lost and alone

When we are together  
You make me feel alive  
Bound forever  
Your love feels right

One more night  
Comes to an end  
One more heartbeat  
For my friend  
No more regrets

Feels like I've known you for so long  
My heart is blank without you  
Tonight, together we're not alone  
Just in you, I confide

It isn't over, when you are gone  
The destination, still lies ahead  
In silver moonlight, our love is awake  
Please forgive me, and don't walk away

One more night  
Comes to an end  
One more heartbeat  
For my friend  
No more regrets

Feels like I've known you for so long  
My heart is blank without you  
Tonight, together we're not alone  
Just in you, I confide

Feels like I've known you for so long  
My heart is blank without you  
Tonight, together we're not alone  
Just in you, I confide

Feels like I've known you for so long  
My heart is blank without you  
Tonight, together we're not alone  
Just in you, I confide
