

## Into the Fire

Firewind

Here we are again, martyrs of the revolution  
The countdown of the human pain  
Nothing left to burn, witnessing the prosecution  
Killing ourselves time and again

Save me! Don't let them take my life from me  
Help me! My fears become reality

Into the fire  
No need to pray for me  
Into the fire  
My tears are black so set me free

Hellfire burns again, angels of this constitution  
The day of reckoning we'll learn  
We're marching to the end, to the final execution  
This blackest day, there's no return

Save me! Don't let them take my life from me  
Help me! Eternal pain is what I feel

Into the fire  
No need to pray for me  
Into the fire  
My tears are black so set me free
