## Into the Fire

## **Firewind**

Here we are again, martyrs of the revolution The countdown of the human pain Nothing left to burn, witnessing the prosecution Killing ourselves time and again

Save me! Don't let them take my life from me Help me! My fears become reality

Into the fire
No need to pray for me
Into the fire
My tears are black so set me free

Hellfire burns again, angels of this constitution The day of reckoning we'll learn We're marching to the end, to the final execution This blackest day, there's no return

Save me! Don't let them take my life from me Help me! Eternal pain is what I feel

Into the fire
No need to pray for me
Into the fire
My tears are black so set me free
