Said I'm shakin' in my shoes sometimes And all alone I get the blues sometimes And I'm far away from home, it seems so far, so far away Many moons and many days You know many things are on my mind I search and search for answers I can't find Then my people I will seek They listen when I speak Believe me when I say Me and my friends go a mighty long way Yea, yea There's nothing that can make this bond to break And if it comes along it must be strong Believe me when I say Me and my friends go a mighty long way Well I look into the cloudy sky And cleanse my soul as the heavens cry My life like a rolling stone Up and down the hills It breaks my ass like a window sill And if I had to do it all by myself There be a threat to my mental health But there's no need to run and hide When folks are by my side Believe me when I say Me and my friends go a mighty long way Yea, yea Yea, yea There's nothing that could make this bond to break And don't even try unless you're ready to die Believe me when I say Me and my friends go a mighty long way Believe my when I say We go a mighty long way
