## **Unyielding Conditioning**

Unyielding Conditioning Tune out from all that's happening Nobody deserves empathy Nobody feels for me We've all been trained by our worlds

I cannot see no one but me No one can feel my emptiness Everybody must fend for themselves We've all been claimed by our worlds

But I have heard of ways That say there's light beyond the darkness And everyone can keep their children warm And togetherness will guide us safely Through all Storms

Unyielding Conditioning Remove all trace of memory No one needs justice anymore No voices raised in anger We've all been tamed by our worlds

But I have heard of ways Where people topple all injustice No one lives their lives on bended knees And all bigotry is like a disease Drowned in the sea And all can hold their head up high! Fishbone
