

All the Worst

Flaw

How do we deal with this?
How do we clean up all this mess?
Will there be a future for the latest generation?
Running around, believing the sound,
Is anything loud enough for us to decipher
Making a stand, extending our hand, we must understand
It's the least we can offer those less fortunate than us

There's something about this place
It brings out all the worst
Our history's been disgraced
Who will destroy who first?

I'm balling up my fists
Waiting here defenseless isn't pacifist
It's ignorant, and cannot be allowed
Maybe it's here or maybe it's there,
We're never aware of just how safe we are
Could it be us or could it be them, unable to trust
The information that we need

This time, will we all, live on?
If hurting still exists
Make it go away
The problems that are plaguing you and I the same

This time, will we all, live on?
Causing it to stay
Counting down the days
It's eating at the very core of us

There's something wrong with this place
