

## Scheme

## Flaw

It woke up in me years ago how this was meant to be  
all of those falsehoods plain to see they dug  
and hung their greed  
will there be profit you could see if only we were blind  
lonely and sheltered, our life is free but it's  
still one step behind  
just like me, they tried their rules on me  
they tried their rules on me, me, me  
i broke those chains and fucking split  
and so you and so you and so you and so you  
pass all the fascist asses ignore those classes  
of bottleneck masses  
producing an all but awful stench, delivering a  
section off all the money stole and spent  
as you start to recognize you're in the game  
growing afflictions head to toe, this never  
should have been  
but placing blame is cowardly restructure must begin  
will there be profit you could see if only we were blind  
lonely and sheltered your life is free, but it's  
still one step behind

yes and the playing board is you...
