

# Anyone Who's Anyone

Fleet Foxes

Charlie never had to get too hot  
Just try sticking with the girl you got  
Other women they would seem secure  
They're just as fragile as her

I heard Sanders in a new good space  
She found Johnny in the strangest place  
At the back of the hotel downtown  
Blood on the side of his mouth

Is there anything that I can do  
All my sympathy it went to you  
I heard you were looking so strung out  
Smiling and tumbling down

The seasons will change  
The things you perceive  
The company will keep disturbing your sleep

It's so much better in the sunlight  
I'm just a little mirage  
It's so much better in the sunlight  
I'm just a little mirage  
It's so much better in the sunlight  
I'm just a little mirage  
It's so much better in the sunlight  
I'm just a little mirage

Oh, oh
