Last Night

Fleetwood Mac

Last night I lost the best friend I ever had Last night I lost the best friend I ever had You know she gone, she gone and left me That made me feel, feel so bad Now it's early in the morning And my love is comin' down for you Early in the morning And my love is comin' down for you I want you to tell me, tell me, tell me baby, now What in the world are we gonna do If she don't come back I don't know what I'm gonna just do If she don't never come back I don't know what in the world I'm gonna do 'Cause she's gone and left me Left me to see the whole night through
