

# Lift (With Love We Will Survive)

Flickerstick

Lift up your head  
Focus on every detail  
Why does this illusion bring so much confusion  
When all I can dream of is you  
Lift up your head  
We're rising with every breath  
A liquid solution a chemical fusion  
When all I can dream of is you

Constantly feeling the earth spinning around  
But I'm standing alone  
With you I see stars in your eyes  
In a trance I'm so high  
With you I survive  
Let's get away now!

Imagine there's no one around  
Imagine you're not just a face in the crowd  
There's a new set of rules  
No more pain of confusion  
You're numb to the world that you know  
I'm constantly feeling like nothing's bringing me down  
cause you're always around  
With you I see stars in your eyes  
In a trance we're alive  
Ten feet off of the ground  
Let's turn it up now!

I got you  
I got you  
I got you  
It's ready for you

Lift up your head  
It's amazing where everyone goes in the end  
Why does this illusion bring so much confusion  
When all I can dream of is you

I'm on the ground  
I'm off the ground  
Ten feet off (when I'm with you)  
Ten feet off (when I'm with you)

I could be true with you  
I could be through with you

Don't you get it we're alive  
Completely out of sight  
We're running out of time  
With love we can survive

Don't you get it we're alive  
Completely out of sight  
With love we will survive
