

# Island

Florida Georgia Line

Yeah this place is wall to wall, can't barely move, takes fifteen minutes just to get a drink  
It's crazy here, this crowd tonight's so loud in here you can hardly think  
But everything's fading babe, cause you're all I see  
It's like we're alone in here baby

We might as well be on an island, we might as well be on the moon  
The way you're looking at me baby, can't take my eyes off you  
Feels like the world is disappearing every time we touch  
We're so caught up in each other, it's just the two of us  
We might as well be on an island, we might as well be on an island  
It's just me and you, back corner booth, we're sitting on the same seat  
Got my hands all over you and, yeah girl, you're all over me  
Like nobody's watching us baby, let them all see  
Still that ain't stopping us baby

We might as well be on an island, we might as well be on the moon  
The way you're looking at me baby, can't take my eyes off you  
Feels like the world is disappearing every time we touch  
We're so caught up in each other, it's just the two of us  
We might as well be on an island, we might as well be on an island  
and

We might as well be on an island  
Like we're the last two on this Earth  
Like we're frozen here in time  
Like it's empty here tonight

We might as well be on an island, we might as well be on the moon  
The way you're looking at me baby, can't take my eyes off you  
Feels like the world is disappearing every time we touch  
We're so caught up in each other, it's just the two of us  
We might as well be on an island, we might as well be on an island, yeah
