

Blinded By Science

Flux of Pink Indians

Pussey eyes is not a pretty sight
But to you it is not a high price
To have your hair shiny and bright
To have your eyes stand out like a light
Four million animals die in experiments
Each year in Britain for what?
So vivisectors can gain praise and a wage
For prodding animals as their bodies distort

Don't think by turning your face the other way
All pain and suffering will just go away

Eighty-eight percent of your experiments
Are done with the use of no anesthetic
But now you've put it's eyes in a bowl
He thinks the animal has been stunned
At the expense of animals' lives
Man has tested and discovered new drugs
But has also destroyed animals eyes
Just so we can live our convenient lives
It's up to you
If you think man is justified
But just save a thought for the animals
That have died in pain for you

Don't think by turning you face the other way
All pain and suffering will just go away

Don't be blinded by scientists
Like so many animals have been
If you think this cruelty is wrong
Protest against it happening
You don't have to use products
That contain animal abuse
There are many many alternatives
Go and have a look

Don't think by turning your face the other way
All pain and suffering will just go away
