

Starlight

Flux Pavilion

We could be starlights
When the world won't turn for no one
Circle the spotlights
When you ain't got nothing to prove

We could be starlights
We could be starlights
We could be starlights

We could be starlights
When the world won't turn for no one
Circle the spotlights
When you ain't got nothing to prove

It's build just on pills
From the halfway night
Circle the nightlife
When you ain't got nothing to prove

We could be starlights
When the world won't turn for no one
Circle the spotlights
When you ain't got nothing to prove

And we'll never make a sound
My feet too firmly on the ground
They're rising on a summer cloud
The water seems to turn so slow

We could be starlights
When the world won't turn for no one
Circle the spotlights
When you ain't got nothing to prove
We could be starlights
We could be starlights
We could be starlights.
