

Lost In You

FM Static

You light up my sky
Just like a firefly
Your words are more than just a passing breath
I wanna feel alive
I need you in my life
You're like a photograph never changing

I've seen you many places
And I still feel the same
Your loves electric I can feel it when you touch me
No one but you connect me
Feel like I wanna change
I got this feeling that today's gonna be a good day

I just want to get lost in you again
And I just want to get lost in you

And we laugh and we turn
And live and we learn and we fight because we care
And we loose and we love
And we push and we shove until there is nothing left to loose

You light up my sky
Just like a firefly
Your words are more than just a passing breath
I wanna feel alive
I need you in my life
You're like a photograph never changing

I've seen you many places
And I still feel the same
Your loves electric I can feel it when you touch me
No one but you connect me
Feel like I wanna change
I got this feeling that today's gonna be a good day

I just want to get lost in you again
And I just want to get lost in you

And we laugh and we turn
And live and we learn and we fight because we care
And we loose and we love
And we push and we shove until there is nothing left to loose

I've seen you many places
And I still feel the same
Your loves electric I can feel it when you touch me
No one but you connect me
Feel like I wanna change
I got this feeling that today's gonna be a good day

I just want to get lost in you again
And I just want to get lost in you

And we laugh and we turn
And live and we learn and we fight because we care
And we loose and we love

And we push and we shove until there is nothing left to loose

You light up my sky

Just like a firefly

Your words are more than just a passing breath

I wanna feel alive

I need you in my life

You're like a photograph never changing

I just want to get lost in you again

And I just want to get lost in you
