

Our Last Nightfall

Fogalord

This evening light show me pages in white
This nightfall rhyme whispers words lost in time

A cold rain is falling down
and the clouds colour dark skies
for his silent goodbye

And when the candle burns
We'll face the storm
Of our last nightfall
Deep in our heart
This twilight rain
Could mark the end of time

I see a dawn of a day full of light
This dark today I forget for a while

When everything falls
as a leaf from an old tree
Fades the darkness with me
