## Valhalla Ascendant

## **Folkearth**

Above the realm of death beyond the crimson clouds out of the winter's reach Valhalla lies - the golden hall

It's there I shall ride
with my battlebrothers
by my side - in honour
forever there to reside

Above the plains of pain beyond the dark of night At the end of the rainbow Valhalla lies - the golden hall

It's there I shall ride
with my battlebrothers
by my side - the glories
Of Odin shall be mine!

Above the realm of men
Beyond the rays of the sun
At life's bloody breaking
Valhalla lies - the golden hall

t's there I shall ride
with those who died
By my side - like kings
For eternity we shall dine
