

Don't Give Up, Don't Give In

For the Fallen Dreams

When everything, and everything is falling down, you don't know
what to do

I can make it clear, if you make it sincere

Pick up the pieces your broken mirror

Forging your skin with a broken knife, that can cut my sword

Give this a chance, give it all you got

Give us a chance, Give us a chance

Give it all you got, we've been given this chance

Nine lives, we've been given this chance

Give it all you got, and don't give in

Give it all you got, or don't pretend

Give it all you got, or don't pretend

I hope you never take steps backwards

All I hear is you want to move on with your life

All I want to do is move along now, so move along now

All I want to do is move along now, so move along now

You need to move forward with your life

You need to move forward with your life

Give it all you got, we've been given this chance

Nine lives, we've been given this chance

Give it all you got, and don't give in

Give it all you got, or don't pretend

Give it all you got, or don't pretend
