

## Summer's Flame

Forefather

Fire conquers the ice  
Frost melts away, the forest can breathe  
Sound filling the air  
The song of the bird and hammer on steel  
Hear the call from afar  
We tread a new path, spreading the seed  
Shine, lady of light!  
Empower the soil, strengthen the yield

Summer's flame riding high  
Golden spears rain on the land  
Eager souls now fly free  
Winter's chill a distant dream

Summer's flame riding high  
Golden spears rain on the land  
Far and wide, seas of green  
Days burn long into the eve
