

Frozen Fire

Forrest Jump

The sunny day there're no clouds on sky
Inside growing tree
Are hidden you and me
The longest lounge of my life - we hide
To be with you's my bread
So I am still glad
Now the wind brings the shade of darkness
The overshadowed sun
Now the wind brings the shade of heartless
We turn to the scum

Frost
It's hard to trust
Lonely souls crust
It's why I disappear
It's killing frost
It's hard ...

Please defrost the fire by your energy
And take me more higher there're many things to see

In the air there's a silent sound
No space to disagree
It's sound of you and me
In sunny day the sound was found
You're stil holding my hand
Yeah I understand
Now the wind ...

Please defrost ...
Please defrost the fire by your energy
For you I'll be what i can be

Frost ...

Frost ...

Take me to the sky

Take me to the sky and defrost the fire

Make me glad and proud
