

# Youth

Foxes

They didn't warn me  
When I was running wild  
The dragons breathing fire  
In the backyard at night

We live in circles  
And it's so hard to breath

Maybe the same old fears what have we here  
Don't bring me down with you

Now I'm just chasing time  
With a thousand dreams I'm holding heavy  
And as we cross the line these fading beats have all been severed  
Don't tell me our youth is running out  
It's only just begun

If I asked you for good news  
Would you smile and turn away  
It's like a bad dream that is too afraid to wake

There are many among us  
And we're changing all the time  
Maybe the same old fears what have we here  
Don't bring me down with you

Now I'm just chasing time  
With a thousand dreams I'm holding heavy  
And as we cross the line these fading beats have all been severed  
Don't tell me our youth is running out  
It's only just begun (x2)
