Ghost Animals

Foxy Shazam

There I was face to face with a grizzly bear In my motel room, I've almost died before I'd gladly do it again, I just can't be beat They took my arms and threw them over there And they took my legs and threw them over there Pop your booty till you get some heat and friction Make some history that nobody be forgettin' It's life or death, you gotta make those consequences Ghost animals When I think my time is up I come back around I died last night, but I'm here today Can you explain that my friend? Yes I can, it means that you are a ghost my friend
