

# Cosmic Vibrations

Foxygen

I don't know, can't decide  
Should I wed or should I take her life?  
I don't know who's in the hive  
Haven't been down there since '35

If you want me, you can have me  
You can have me but I'm all used up  
In the sun, in the sunlight laughing

3-D vision  
Look at me, look at you  
See the sunlight on the ocean  
In my head, when the wind  
Whistles and your head blows bells  
I put my mind into the ocean  
Haven't been down there for many long years  
Tropical fruit, mystery cave snail stones  
All books come from Minnesota, so  
Heed my relation at the radio stations  
I am your patient  
Lovely red raincoat

If you want me, you can have me  
You can have me but I'm all used up  
In the sun, in the sunlight laughing

Cosmic vibrations  
Love is the answer

But where must we go again to become friends?  
Where must we go again to become friends?  
Where must we go to become friends?  
Where must we go again to become friends?  
Where must we go...?
