

In The Darkness

Foxygen

Maybe in my mind there is an elegant land in the darkness
And maybe in my mind it's a hell of a time in the darkness
And maybe in space, there's an alien race
I wouldn't be surprised
So without further adieu we'd like to introduce you to
The darkness

Now I'm standing in the country side
With solar power from He's always standing outside lookin' in
They smile but they don't look at him
They say it may take a while to put more diamonds in my smile
And maybe I wont even go to work that day
I don't care if I'm in trouble at all
I'll just sit on the sand with my fingers in the still of the darkness
