

Lights Go Out

Fozzy

When the lights go out & the mercury rises
Angels fall to the other side
Fear meets lust, just us colliding
When the lights go out, we own the night

Blood-red pumps up against your body
Beating like drums sucked in the fire
Wrong feels right, don't try to fight it
Cause the night dissolves into desire

When the lights go out
The walls come down
We sound just like animals
Inhibitions lost & lines get crossed
You get me off
When the lights go out

Now I lay down, but no one's sleeping
Now I lay you down here in the dark

Lights go out to shouts & screaming
No one gets out without a scar

When the lights go out
The walls come down
We sound just like animals
Inhibitions lost & lines get crossed
You get me off
When the lights go out

I can feel it coming, feel your body humming
Pushing buttons when the lights go, lights go
I can feel it coming, feel your body humming
Self-destructing when the lights go, lights go

When the lights go out
The walls come down
We sound just like animals
Inhibitions lost & lines get crossed
You get me off
When the lights go

When the lights go out
The walls come down
We sound just like animals
Inhibitions lost & lines get crossed
You get me off
When the lights go out

When the lights go out
